NAUTICAL INSTRUMENTS DATA
CHARTS & BOOKS

How to preload data to prevent future downloads

Importing Base AVCS DVDs

In some case it may be beneficial to pre-install the charts from both base DVDs, as less data would be required for future downloads. In the example below, base DVD2 is mounted on the f-drive, please note that based on your setup, this folder/drive might be different. Depending on your computer configuration, it may take a while to install the charts. It is recommend that you do not interrupt the chart installation, once it has begun.

You may choose to either Pre-install charts only with permits or to include charts, which you do not have a permit for.

Importing e-NPs

There are several ways to import e-NPs. You can drag-and-drop individual e-NPs, multiple e-NPs, you can drag-and-drop a folder containing the e-NPs or can click the browse button to browse to the folder, where the e-NPs are located and then click import.

The screenshot shows the 'Information' panel in the Weilbach software. It displays a list of e-NPs (e-Nautical Publications) with columns for Number, Publication, Licence, and Installed. A file explorer window is open, showing a folder named 'Publications' containing several PDF files. A red arrow points from the 'Import' button in the software to the 'Publications' folder in the file explorer. Another red arrow points from the 'Browse' button to the 'Publications' folder. A third red arrow points from the 'Install from disk' button to the 'Publications' folder. The 'Import' button is labeled 'Import' and the 'Browse' button is labeled 'Browse'.

Number	Publication	Licence	Installed
e-NP68	East Coast of the United States Pilot Vol 1	40.90 GBP - 12 Months	6.5MB
