Refer to the "**Nmea Service- Installation and IT Admin Guide.pdf**" document included in this release before installing any software.

Release Contents

This release contains the following files.

Documentation

- Nmea Service- Installation and IT Admin Guide.pdf

Prerequisites

- aspnetcore-runtime-6.0.16-win-x86.exe
- windowsdesktop-runtime-6.0.16-win-x86.exe

Software

- NmeaService.Setup.msi

Release Notes – 1.2.2.2

The service now supports the full variety of Talker IDs found at the start of NMEA messages.

Previous Release Notes – 1.2.1.4

The service now properly honours the log settings in the application configuration file. This enables debug logging to be temporarily enabled on customer installations in order to diagnose problems.
